# About This Report

Thank you for participating in the National Study of Learning, Voting, and Engagement (NSLVE). Since NSLVE's launch in 2013, more than 1,100 colleges and universities have signed up to receive their voting rates for the 2012, 2014, 2016 and 2018 federal elections. Along with others, your institution's participation in this study has helped us build a robust database for research on more than 10 million de-identified student records for each election year.

NSLVE is a signature initiative of the Institute for Democracy and Higher Education (IDHE) at Tufts University's Jonathan M. Tisch College of Civic Life. IDHE is an applied research center focused on college and university student political learning and participation in democracy. IDHE researchers study voting, campus conditions for political learning and discussion, closing equity gaps in participation, and increasing student agency and participation. We accomplish our goals through research, resource development, assisting institutions and the higher education community, and advocacy.

## About the Data

The voter registration and voting rates in this report reflect the percentage of your institution's students who were eligible to vote and voted in the 2012 and 2016 elections. These results are based on enrollment records your institution submitted to the National Student Clearinghouse (Clearinghouse) and publicly available voting files collected by L2. We exclude FERPA-blocked records. (For exceptions for campuses with disproportionately high numbers of FERPA blocked students, see our Campus Reports FAQ (link below).

If this report does not contain race/ethnicity and/or gender data, please ask your registrar to complete the "race/ethnicity" submission for the Clearinghouse. Be sure to flag "non-resident aliens" (the government's technical term for non-citizen international students) so that we can provide a more accurate count for your "eligible voters."

The institutional voting rates reported on page 3 are adjusted by deducting an estimated number of students identified by each institution as non-resident aliens (NRAs) and reported to the Integrated Postsecondary Education Data System (IPEDS). For breakdowns by student characteristics in subsequent pages of the report, we cannot consistently adjust for students who are ineligible to vote: non-resident aliens (NRAs), resident aliens, undocumented students, and students who have been disenfranchised due to a felony conviction. For this study, these terms are used as defined by [IPEDS](#).

As a result of the adjustment challenges, your institution's actual voting rate may be higher than we report. If you have access to more complete data for students who are ineligible to vote, you may recalculate your rates by using the **Recalculation Tool** - <https://idhe.tufts.edu/nslve-recalculation-tool>.

Some NSLVE institutions do report the counts of NRA students to NSC. When this number is comparable to the counts reported in IPEDS, we remove the counts of these students from all our calculations.

To read more about NSLVE data, see our **Campus Reports FAQ** - <https://idhe.tufts.edu/nslve/frequently-asked-questions>.

## Reviewing the Data

Use the following key to interpret the charts:

\* = number of students is less than 10

n/a = no data was collected or calculated for this field.

## What to do next?

❑ Review the data and identify your challenges and opportunities. This report provides comparisons between subgroups of your students and with similar institutions. For more comparisons or to see national voter registration and voting rates, read our national report, Democracy Counts 2018. To access our data portals - <https://idhe.tufts.edu/public-data-portal-visualizations>.

❑ Share the report widely and strategically by sharing it with institutional leaders, faculty across disciplines, student government leaders, and other student groups.

❑ Read and implement *Election Imperatives*, ten recommendations for improving your campus climate for student political learning, discourse, equity, and participation - <https://idhe.tufts.edu/electionimperatives>.

❑ Work with us. IDHE can help via virtual office hours, webinars, brown bag discussions, coaching, and in-person workshops.

\* Since your branch does not report data to IPEDS separately from your main campus, we could not calculate an estimated number of non-resident aliens enrolled at your campus and adjust your voting rates accordingly to account for these ineligible voters. Thus, your campus's actual voting rates may be higher than we report because they are adjusted only for students who were age ineligible to vote and whose records were FERPA blocked.

\* Your students' data broken down by age at the time of the election. To provide more accurate voting rates, students ineligible to vote because they were too young, students whose age data was not reported to the Clearinghouse, as well as records that were FERPA blocked are removed from this table. Please note that we are not able to adjust these voting rates by removing non-resident aliens, resident aliens, undocumented students and felony disenfranchised students.

\* Your students' data broken down by undergraduate students' class level. The total count of undergraduates in this page can be different than the count in the previous page since we use a different data element submitted to the Clearinghouse to derive this information. To provide more accurate voting rates, students ineligible to vote because they were too young, students whose age data was not reported to the Clearinghouse, as well as records that were FERPA blocked are removed from this table. Please note that we are not able to adjust these voting rates by removing non-resident aliens, resident aliens, undocumented students and felony disenfranchised students.
